OSS INDICATORS CALENDAR

The Indicator Calendar allows a trader to get a general idea of how stocks will perform over the week, and a more accurate idea of how the individual days will go. Know whether stocks will finish higher or lower can be a very profitable piece of knowledge when trading Nadex binary options. The following page contains a break-down of each day.

All indicators have a +/- 1-day window in which their energy should be seen.

Monday

Sunday was Bearish due to the Lunar Latitude reaching its Southern most point. Sunday and Monday had the Moon in the Bearish Sign of Scorpio. This would have given a Bearish outlook for Monday, but in the U.S., Monday was a holiday. We did see this Bearish energy release in the Italian Bank system. The Bullish/Bearish count was slightly bearish at -1.

Tuesday

According to the indicators, this should have been a mildly bearish day, but the overflow from the Italian Bank crisis gave the U.S. stock exchange to drop sharply. The high volatility on Wednesday also manifests itself during its entire 3-day window. We expect the DJIA to make a +/- percentage move of 1% when the volatility number is 2 or greater. The Bullish/Bearish count was slightly bearish at -1. The Moon is in the sign of Sagittarius. This often brings large price movements.

Wednesday

The Moon is in the sign of Sagittarius. This often brings large price movements. The Bullish/Bearish count moved to 0 from -1. This indicates some increased bullish energy. Volatility continues to be high due to it hitting 2 on Wednesday.

Thursday

The Moon is in the sign of Sagittarius. This often brings large price movements. Volatility continues to be high due to it hitting 2 on Wednesday. The Venus Trine Jupiter aspect on Friday is now introducing a large amount of Bullish energy, but the Lunar Declination reaching its Southern most degree is bearish, and stronger than the Venus Trine Jupiter aspect. There was enough bearish energy for me to predict a lower close, and recommend some Nadex Binary options that returned a 104% profit.

Friday

The Bullish/Bearish count moved to 1 from 0. This indicates some increased bullish energy. The bullish energy from the Venus Trine Jupiter aspect was not able to manifest itself on Thursday, so now we expect it to do so today. Plus the Mercury Latitude reached 0°. With two such strong bullish energies, predicting a higher Close for stocks was a no brainer. The Nadex binary options returned a 100% profit.
