Matrix Summary 4

Get Signals You Can Rely On

Summary

The week started with two forecasts:

1. The beginning of the week would be more Bearish than the latter part of the week.
2. Thursday and/or Friday would close higher.

You can see in the Matrix that both of these forecasts were correct.

One forecast I failed to mention was the Sun square the Moon on Wednesday. You can expect to see a lower close on either the day before, the day of, or the day after. This week all three days closed lower.

The Matrix Summary did a good job of forecasting how the week would unfold. The only incorrect forecast was Friday which should have seen a lower close. All indexes except for the IWM closed higher. This can be explained by the fact that Thursday and/or Friday should close higher, but with Thursday closing lower, the probability of a higher close on Friday was greatly increased.
