WEEKLY MATRIX

The weekly forecast was Bearish for the week with Wednesday being the only day of the week that a close higher was possible.

Thursday took the biggest hit with the DJIA losing -1.35%. No surprise there. Thursday fell right in the middle of a three day solar disturbance.

Friday had no clear signal to close higher or lower, but being the last of the three day solar disturbance, we should conclude the damage was done on Thursday and the markets should have close higher.
