Weekly Matrix

The Mercury Retrograde is still active till the 28th, but the Matrix was accurate most of the week.

1. In the Aspects row you can see lots of Bearish energy on Sunday and Monday. The planetary aspects usually reach their peak influence the day of or the day before. So Monday could have gone either way.
2. Tuesday the Lunar Sign energy turned Bearish and the Bullish/Bearish energy turned bullish. The only other indicator to pay attention to was the date which was the 20th. The most Bearish of any of the other calendar dates. Stock did move lower.
3. Wednesday the Bullish/Bearish energy ticked up a Bullish 3 points, the the Bearish Venus Mars square tells us that Wednesday or Thursday should close lower. You would expect the Venus Mars aspect to have a stronger influence than the Bullish/Bearish count, but stocks closed higher.
4. Thursday we would expect a lower close because the Bearish Venus Mars square did not lead to a lower close on Wednesday. We should have also expected a close or at least an intra-day move greater than 1% due to the elevated Volatility indicators. Thursday had a volatility reading of 2 and Friday it went higher to a 3. NDX closed lower by -1.64%. Other indexes saw an intra-day move of 1% or greater. The Sun Moon trine on Friday could have influenced the markets with some Bullish energy, but it was no match compared to the Venus Mars square.
5. On Friday we had already seen a pull-back which we attributed to the Venus Mars square. Just that one thing should have told us to watch for a move higher. Another Bullish sign was the peak of the L3 and L4 cycles. Plus we had a trine between the Sun and the Moon. The Volatility indicator was still in play and was stronger than it was on Friday. A higher close and a move of 1% should have been expected.

Starting this coming week, I will be adjusting the Matrix Summary based on the previous day's outcome. Had I done so this last week, see Figure 2, the Matrix Summary would have looked different which you can see in Figure 3 – Dynamic Matrix Summary.
