Weekly Matrix Commentary

This was a strange week due to the space weather disturbance forecast by NOAA. Every day the forecast was in the double digits signaling a downward move for stocks. The indexes lost 2%-3%. DJT lost 6%. The worst days were Monday and Tuesday when the forecast by NOAA was in the 20's. On Wednesday the forecast improved to 12 (4). Having seen the drops on the first two days of the month, it was a good bet that Wednesday would see a higher close, and it did.

Another indicator to a Bearish week was the Full Moon on Friday. Stocks are more likely to fall into the Full Moon

Here is a study done by the Federal Reserve Bank of Atlanta titled [Playing the Field: Geomagnetic Storms and the Stock Market](#)

The Matrix Summary charts had two days when the forecast did not change from the previous day. This would be Tuesday and Thursday, so there is no way to know if the market close higher or lower. The only days the could be forecast was Wednesday and Friday when a higher close was expected. Both days did close higher.

Matrix Summary

I thought it might be more helpful if I display the daily activity in a candlestick chart format instead of a bar chart.

The Summary is created by applying weighted values to the indicators in the Weekly Matrix.

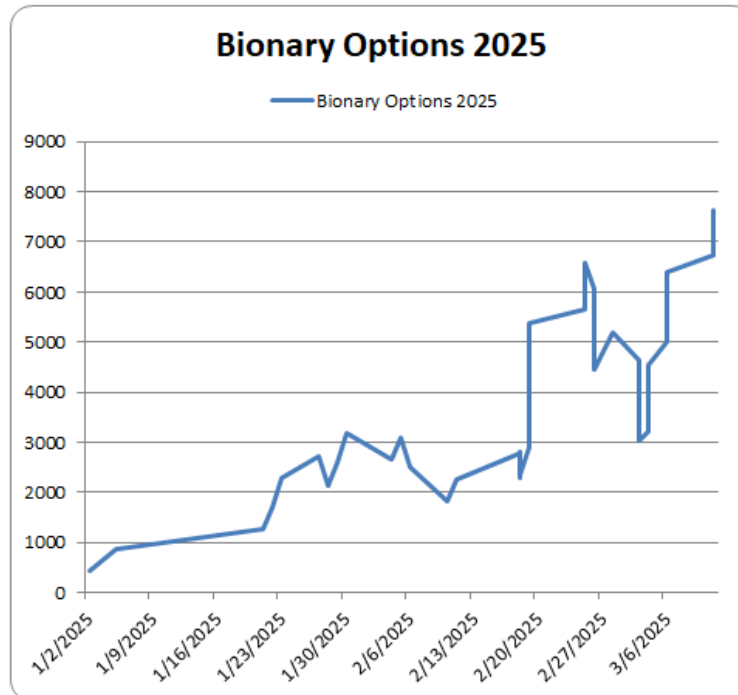

Binary Options Trades

The results show results for 10 contracts per Index. You can trade only 1 contract if you wish.

Ticker	Option	Signal	Entry Date	Entry Price	Exit Date	Exit Price	P/L	PER
WALL ST 30	(Mar)>41480 (4:15pm)	BUY	3/11/2025	\$530.00	3/12/2025	\$990.00	\$460.00	87%
US TECH 100	(Mar)>19400 (4:15pm)	BUY	3/11/2025	\$530.00	3/12/2025	\$990.00	\$460.00	87%
US SMALLCAP 2000	(Mar)>2028 (4:15pm)	BUY	3/11/2025	\$530.00	3/12/2025	\$860.00	\$330.00	62%

Binary option profits for 2025 trading 10 contracts. If you wish you can trade as little as 1 contract that would cost you \$45-\$55.

Algo Forecasts

The Blue line is the Algo Forecast.

The forecasts worked out well except for AAPL. Its dump was expected last week, but it did lose ground this week.
