Weekly Commentary

All matrix indicators are expected to manifest within a +/- 1-day window.

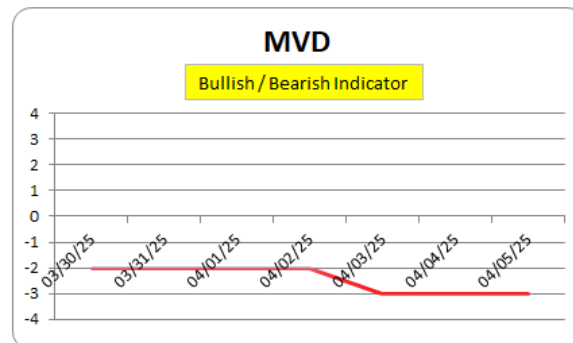

The Matrix showed a Bullish beginning to the week then Bearish energies manifesting on Thursday and Friday as forecasted. Additionally, the NOAA forecast for Friday was extremely Bearish and the Volatility Indicator warned us of a major move at the end of the week. The new MVD Cycle Indicator was Bearish the entire week but got even more Bearish the last two days of the week.

Mercury Retrograde: Last week the Matrix Summary correctly forecast only one correctly. The average is three days a week. I chalk that up to the Mercury Retrograde. This week the Matrix Summary was spot on, but the Algo forecasts were way off for IWM, QQQ and AAPL. I'll chalk that up to the Mercury Retrograde. Thankfully, the retrograde ends tomorrow, April 6th.

Matrix Summary

I thought it might be more helpful if I display the daily activity in a candlestick chart format instead of a bar chart.

The Summary is created by applying weighted values to the indicators in the Weekly Matrix.
