Weekly Commentary

All Matrix indicators are expected to manifest within a +/- 1-day window.

Weekly Matrix

Last week, The Matrix provided several bullish indicators.

The Bullish/Bearish numbers were bullish all week, with each day's value in the double digits.

Moon Signs

The Moon was in bullish zodiac signs, such as Taurus and Virgo, believed to favor market gains

Planetary Aspects

There were few planetary aspects, except for the Venus-Neptune conjunction on Friday, April 25, 2025. This bullish aspect, without other major aspects, likely influenced the entire week.

MVD Indicator

The MVD indicator remained at a bullish 4 all week, the highest level this indicator can reach.

SPY Reversals

One of the SPY Reversal Indicators fell on the 30th. We'll see if the indexes move lower next week.

Matrix Summary

In the Matrix Summary, it correctly predicted the direction of the close on three days but was incorrect on Tuesday, April 29, 2025. Wednesday was not counted because the forecast did not indicate a clear move higher or lower.

Algo Forecasts

Bullish (Moved Higher): AAPL, IWM, QQQ, TLT

Bearish (Moved Lower): GLD, USO

Matrix Summary

I thought it might be more helpful if I display the daily activity in a candlestick chart format instead of a bar chart.

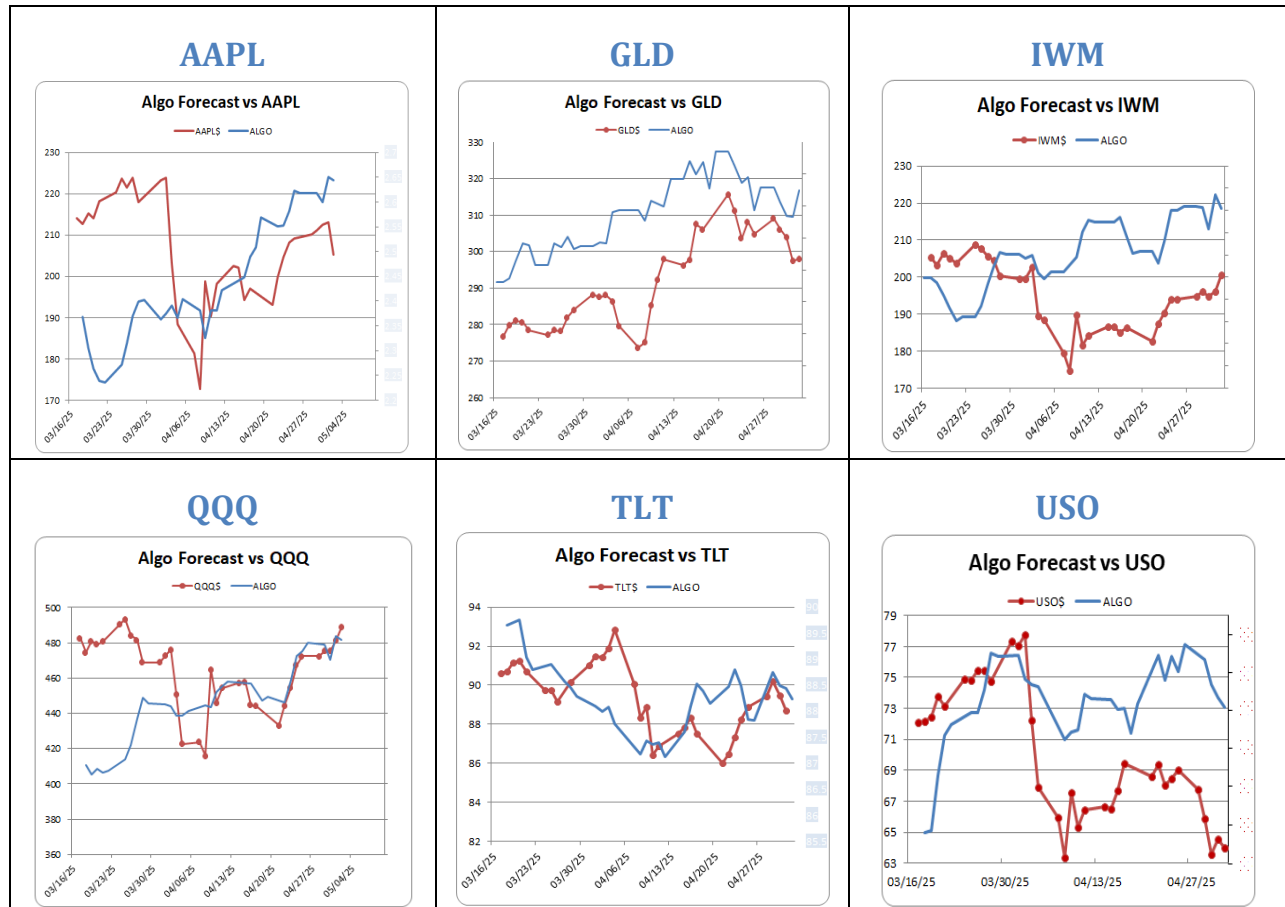

The Summary is created by applying weighted values to the indicators in the Weekly Matrix.

The Blue line is the Algo Forecast.
