All Matrix indicators are expected to manifest within a +/- 1-day window.

The Matrix suggested more bearish energy in the beginning of the week, bullish energy on Wednesday and Thursday. Friday saw an increase in the NOAA forecast that put us back into the Bearish range. We also had a Bearish planetary influence on Friday.

MVD Indicator was at a bullish 4 for the 3rd week in a row. The SPY has gained 9.26%

Matrix Summary

The daily forecast of a higher or lower daily close was correct all five days, but I never take credit for Monday's because my track record for the first day of the week has been 50/50.

I thought it might be more helpful if I display the daily activity in a candlestick chart format instead of a bar chart.

The Summary is created by applying weighted values to the indicators in the Weekly Matrix.

Algo Forecasts

The Blue line is the Algo Forecast.

Bitcoin

We didn't see a significant drop in the Daily Chart, but the Algo forecast was strongly bullish. Next week could see sharp drop.

Option Trades

We had three option trades last week.
