Weekly Commentary

All Matrix indicators are expected to manifest within a +/- 1-day window.

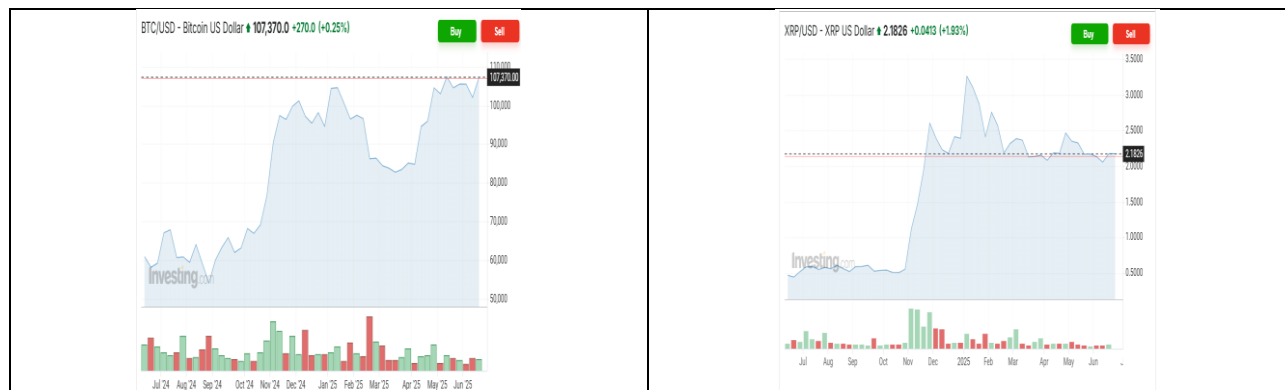

Most assets tracked performed in line with the Algo forecast, except for stocks. AAPL, IWM, and QQQ significantly deviated from their predicted paths. While the Algo forecast for these assets shows a minor spike, it's unlikely this small uptick accounts for their sharp upward surge. External factors may be driving the market higher, but the forecast still trends downward. We expect these assets to correct lower soon. Time will tell.

GLD, TLT and USO are continuing to follow their forecasts.

The Matrix was bullish last week, but there was a significant space weather disturbance on Wednesday and Thursday with the worst of it hitting on Wednesday. All we saw was a mixed close for the indices then a surge higher on Thursday. These forecasts from NOAA mean the Sun is shooting something our way that will cause a disturbance. I am wondering if I should asked the question: Where on Earth will this hit the hardest? It may be worth looking into.

The space weather disturbance was enough for me to buy some SPY Puts. Of course we got stopped out.

A subscriber asked if I had an Algo forecast for Ethereum. Unfortunately, I do not, but I decide to give it some thought and decide it was not worth the time. Bitcoin and Ethereum move to much in unison. However, I took a look at XRP. There seems to be enough of a difference to justify an Algo forecast for XRP. If enough of you would like me search for an Algo for XRP, let me know.
