Weekly Commentary

All Matrix indicators are expected to manifest within a +/- 1-day window.

The forecast for the week was bullish, primarily due to the Venus-Uranus conjunction, which has historically shown a bullish influence on the stock market. A bullish influence was expected around Wednesday, when the Moon and the Sun formed a square aspect. NOAA also forecasted a space weather disturbance peaking on Wednesday. Tuesday turned out to be the weakest day of the week, with SPY, SPX, and QQQ closing lower. Thursday was the most bullish day. According to the Matrix Heat Map, although trading lasted only half a day, stock indices recorded the largest daily gains of the week.
