The blue line forecasts direction, not price.

## Summary

### Weekly Matrix Indicators

**Mercury is now retrograde. We expect indicators and forecast to a little less accurate than normal.**

- Heat Map correctly predicted a lower close on Tuesday but incorrectly predicted a higher close on Thursday.
- The Matrix Summary vs SPY was right only 50% while typically it is correct 75% of the time
- NOAA's space weather forecast suggested a likely close lower on Tuesday which it did.
- The SPY Small Reversal Indicator correctly forecast a directional change on Monday or Tuesday. It was a weak signal. The reversal lasted only two days.
- All but one of the Algo forecasts for the week were correct.

## Matrix Heat Map

## Matrix Summary

**Mondays** are not included in the analysis. As usual, the indicators forecasted three days correctly.

## SPY Small Reversal Signals (SSRS & SSRSM)

These indicators are doing a good job of forecasting 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.

The next reversal is on the 24th/25th

Same as the **SPY Small Reversal Signals** just presented differently so you can see the projected strength of the reversal.
