The blue line forecasts direction and magnitude, not price.

Summary

Weekly Matrix Indicators

- I am repeating myself “Once again, Trump’s statements seem to be driving the market” but I have more to add this week: The statements are being leaked. Multiple influencers on social media are noticing huge position (in the billions) being opened an hour or 2 before Trump’s statements are made public.
- Algo forecasts, some going back to the beginning of the year, are still maintaining their accuracy.
- Heat Map forecasted a bullish beginning of the week and a bearish latter part of the week. The most bullish day was Tuesday which did close higher. Wednesday – Friday were all bearish. But along come Trump and announces a ceasefire on Tuesday evening sending stock indices up 13.87% on Wednesday, which also had a high volatility indicators. Friday actually did close lower.
- The Sun Trine the Moon on the 7th suggests a high close on the 6th and/or the 7th. Both days close higher.
- The Sun squared the Moon on the 9th, We should have seen a lower close on the 8th and/or the 9th. Neither happened which is rare, but a lower close on the 10th is almost a sure thing. The 10th did close lower.
- The SSPSM chart had a reversal on the 1st but the SPY went sideways. The next reversal was on the 6th which suggested a move higher which is what happened.

Matrix Summary

Mondays are not included in the analysis. As usual, the indicators forecasted three days correctly.

SPY Small Reversal Signals Magnitude (SSRSM)

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.
