# Algo Forecasts

What are Algo Forecasts: [http://oss.cc/education/algo\\_forecasts.pdf](http://oss.cc/education/algo_forecasts.pdf)

The **blue line** forecasts direction and magnitude, not price.

**Red circle** = Short-term bearish move expected

**Green Circle** = Short-term bullish move expected

## Summary

- The **Matrix Heat Map** gave us only two signals this week. A lower close was expected on Wednesday and a higher close on Thursday. Wednesday closed lower for most indices but a close higher for the DJI of 0.30% gave us an average close for the indices of 0.20%. While it was not a lower close, it was the smallest higher close for the week. While Thursday had a value of -4, it was an increase of 8 points from the previous day so we would expect a higher close. Thursday close up 2.59%. Those were the only two days we could have forecast.
- **The Matrix Summary** correctly forecast a daily higher or lower close 3 out of 4 days this week.
- **Algo Forecast** Computing pivot points for most of the assets being followed is almost complete. AAPL is up 4.52% since its bullish pivot on the 19<sup>th</sup>. BTC is down 11% since its pivot on the 11<sup>th</sup>. TLT is up 2% since its pivot on the 20<sup>th</sup>.

The Matrix Heat Map, a simplified version of the Matrix, applies adjusted weightings to its values. Forecasts for Mondays are 50/50 so they are ignored.

## Matrix Summary

**Mondays** are not included in the analysis. As usual, the indicators forecasted three days correctly.

## SPY Small Reversal Signals Magnitude (SSRSM)

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.
