Algo Forecasts

What are Algo Forecasts: http://oss.cc/education/algo_forecasts.pdf

The **blue line** forecasts direction and magnitude, not price.

Red circle = Short-term bearish move expected

Green Circle = Short-term bullish move expected

Summary

- The **Matrix Heat Map** Had Tuesday as the most bearish day of the week. It did close lower, but it closed much lower on Wednesday. Remember the +/- 1-day window. Friday was the only bullish day. It closed higher, but there again it was the day before that had the target close.
- **Lunar Aspects** pointed to at least one close higher on Tuesday and/or Wednesday. Tuesday had a mixed close while Wednesday dropped like a rock. When neither of these show a positive close, the odds are greatly increased that it will happen on the next day. Sure enough, Thursday had an explosive move higher.
- **The Matrix Summary vs SPY** was 100% accurate predicting whether the market would close higher or lower on Tuesday thru Friday. No attempts are made for predicting Monday.
- **Algo Forecast.** AAPL, GLD, IWM, QQQ, USO and BTCUSD all pulled-back as the algo forecasted. DXY and TLT moved higher as forecasted.

The Matrix Heat Map, a simplified version of the Matrix, applies adjusted weightings to its values. Forecasts for Mondays are 50/50 so they are ignored.
