Algo Forecasts

What are Algo Forecasts: http://oss.cc/education/algo_forecasts.pdf

The **blue line** forecasts direction and magnitude, not price.

Red circle = Short-term bearish move expected

Green Circle = Short-term bullish move expected

Summary

This week's market indicators had to contend with two major disruptors: the shortened holiday trading week and Mercury Retrograde.

The Heat Map forecast was effectively shifted by one trading day throughout the week. It identified Tuesday as the week's most bearish session, but the market instead finished higher on Tuesday before declining on Wednesday. Likewise, the most bullish signal pointed to Thursday, yet the market closed lower that day. Under normal circumstances, Friday was expected to produce a higher close, but the Independence Day market holiday prevented that forecast from playing out.

The Matrix Summary correctly projected stronger closes between Tuesday and Thursday. Tuesday and Wednesday both finished higher, while Friday marked the week's highest price before reversing to close lower.

Although Friday ended with a loss, it generated the week's highest volatility reading, producing the largest intraday price swing of any trading session.

Heat Map

Matrix Heat Map							
	Bearish				Bullish		
	-3	-2	-1	0	1	2	3
Dates	06/28/26	06/29/26	06/30/26	07/01/26	07/02/26	07/03/26	07/04/26

All indicators have a +/- 1-day window in which their energy should be seen.

Matrix Summary

Mondays are not included in the analysis. As usual, the indicators forecasted three days correctly.

SPY Small Reversal Signals Magnitude (SSRSM)

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.
