Summary

On the Weekly Matrix, the Bullish/Bearish indicator registered bearish readings on Monday and Tuesday, then shifted to bullish for the remainder of the week. The Lunar signs similarly showed bearish readings from Monday through Wednesday, turning bullish on Thursday and Friday. Taken together, these two indicators suggested a bearish start to the week followed by a bullish latter half. This aligned with actual market behavior, as the indices declined on Tuesday and Wednesday before recovering on Thursday and Friday.

The Moon formed a square aspect with the Sun on Tuesday, a configuration that typically suggests a lower close on Monday and/or Tuesday. Tuesday did, in fact, close lower.

On Thursday, the Moon formed a sextile with the Sun, an aspect associated with a higher close on Wednesday and/or Thursday. Thursday closed higher, consistent with this expectation.

The NOAA forecast was bearish for Thursday and Friday; however, neither day closed lower. Not surprising as it was outnumbered by the number of bullish during this part of the week.

Overall, the Matrix Summary achieved a 100% success rate this week, correctly forecasting the directional close—higher or lower—for each trading day from Tuesday through Friday.

The Avg Performance-found in the Weekly Matrix-indicator marked Tuesday and Thursday as bullish days. Both closed higher.

Heat Map

The Matrix Heat Map, a simplified version of the Matrix, applies adjusted weightings to its values. Forecasts for Mondays are 50/50 so they are ignored.

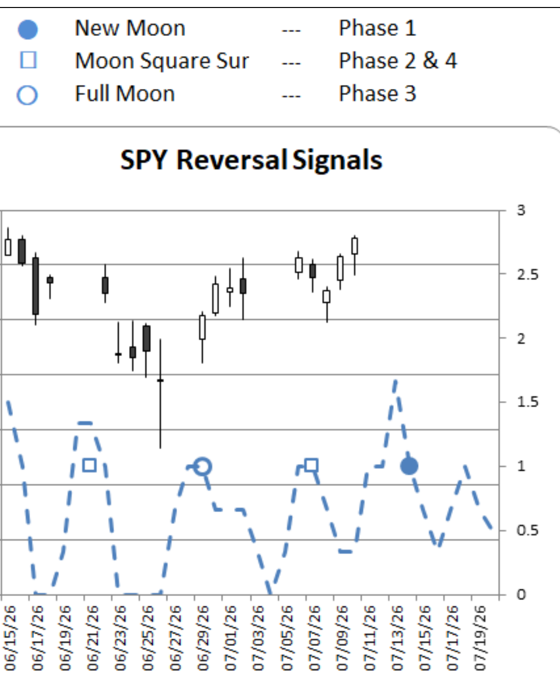
SPY Small Reversal Signals Magnitude (SSRSM)

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.



Reversals are likely to occur when the dotted blue line moves above 0.5 or sinks to 0. Also when the Moon changes phases.
