Algo Forecasts

What are Algo Forecasts: http://oss.cc/education/algo_forecasts.pdf

The **blue line** forecasts direction and magnitude, not price.

Red circle = Short-term bearish move expected

Green Circle = Short-term bullish move expected

Summary

****Heat Map****

Despite the first two trading days of the week registering as the most bearish, equity markets closed higher on both sessions. The following day produced a sharp sell-off, with the Dow Jones Industrial Average and the QQQ each declining more than 2%. Applying the ± 1 -day rule, this constituted a successful signal. Friday marked the most bullish day of the week, and markets closed higher.

****Bullish/Bearish Indicator****

The indicator remained at zero throughout the week until Friday, when it rose to 2. The market closed higher that day—the only actionable reading generated during the period.

****Matrix Summary****

While the matrix showed limited accuracy in forecasting daily closes, it correctly anticipated a mid-week decline followed by a recovery that left markets higher by week's end.

****SPY Reversal Signal****

Prices declined from the highs established at the New Moon and subsequently reversed higher in conjunction with the Full Moon.

****Options****

Nine trades were executed during the week, generating a total return of 392.40%. Eight of the nine positions were profitable.

Heat Map Methodology

The Matrix Heat Map is a simplified version of the full Matrix that applies adjusted weightings to its underlying values. Because Monday forecasts have historically produced approximately 50/50 outcomes, they are excluded from the Heat Map analysis.

Matrix Summary

Mondays are not included in the analysis. As usual, the indicators forecasted three days correctly.

Forecast of which days will close higher or lower, or will close higher or lower than the open. This indicator may be adjusted 1-day.

SPY Reversal Signals

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.
