Heat Map Methodology

The Matrix Heat Map is a simplified version of the full Matrix that applies adjusted weightings to its underlying values..

Comments: The Heat Map did not agree with any of the other indicators except on Friday. That was the only day we could have had confidence the close would be lower.

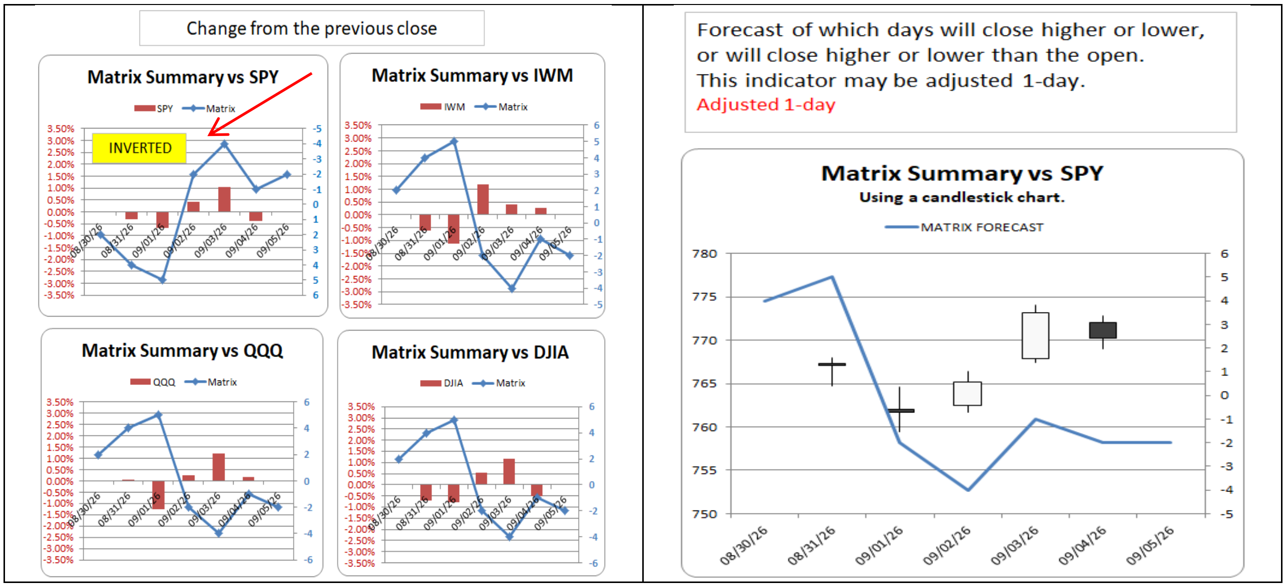
Matrix Summary

Mondays are not included in the analysis. As usual, the indicators forecasted three days correctly.

Comment: The Matrix Summary vs SPY (candlestick chart) was right 3 out of the last four days of the week when it was adjusted by one day. If the forecast for the entire week was inverted, it was right in forecasting the direction of the close for the entire week.

The inversion and the adjustment of 1 day both forecast a lower close on Friday.



Weekly Matrix

Comment: The big event this week was the bearish Mars Square Saturn aspect on Tuesday. The same day the Volatility indicator rose to a 4. Markets retreated on Monday and Tuesday. By Wednesday, the major bearish energy had ended, and the markets moved higher.

Notice the Sun trine the Moon on Tuesday. We usually expect a higher close on the day before or on the day of the aspect. If both days close in the wrong direction, then the day after the aspect has an even higher chance of closing up, which it did on Wednesday.

The Sun square the Moon on Friday would signal a possible lower close on Thursday and/or Friday. Three of the major indices did close lower on Friday.

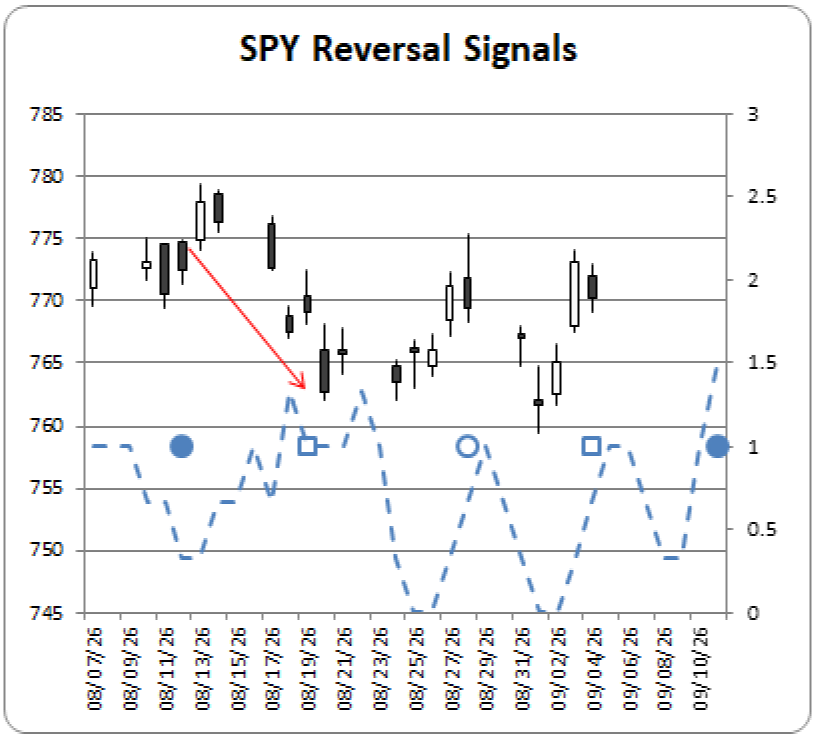
SPY Reversal Signals

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.

Comment: Should see a reversal down this coming week.

●	New Moon	---	Phase 1
□	Moon Square Sun	---	Phase 2 & 4
○	Full Moon	---	Phase 3



Reversals are likely to occur when the
dotted blue line moves above 0.5 or sinks to 0.
Also when the Moon changes phases.
Full Moon to New Moon is usually bullish.
New Moon to Full Moon is usually bearish.
