SPY Reversal Signals

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.

COMMENT:

Market rose into the spike {1} on the 22nd then fell into another spike [2] on the 25th and is now rising.

Reversals are likely to occur when the dotted blue line moves above 0.5 or sinks to 0.

Also when the Moon changes phases.

Full Moon to New Moon is usually bullish.

New Moon to Full Moon is usually bearish.

Option Trades

COMMENTS:

Once again we ended the week with a profit.

The SPY and QQQ puts did not fit the strategy, but the Matrix was very bearish for Thursday and Friday, so I posted them. Without those two, the stats would have been:

Profits: 125.02%

No Trades: 7

Avg Profit: 17.86%

A third filter was added in the hope it would reduce the number of trades. Trying to place up to 6 trades in the last few minutes of trading can be difficult.

The addition of the third filter dropped the number of trades this week from 9 to 4, and increased our profits.

Profits: 322.57%

No Trades: 4

Avg Profit: 80.64%
