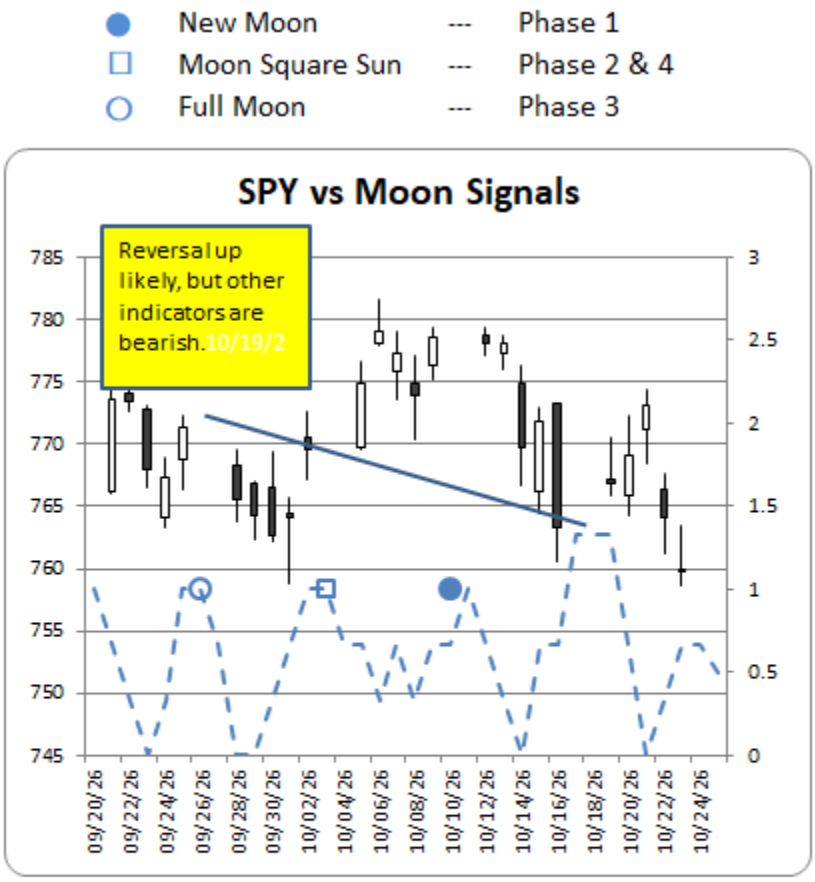
SPY Reversal Signals

COMMENT: We got the expected reversal



Reversals are likely to occur when the
dotted blue line moves above 0.5 or sinks to 0.
Also when the Moon changes phases.
Full Moon to New Moon is usually bullish.
New Moon to Full Moon is usually bearish.

When the **dotted blue line** moves above **0.5**, there is a high probability of a 2 to 3 day reversals. The reversals could last longer but 2 to 3 days is the minimum to be expected.
